Medical Waste Disposal Is Our Specialty

Statewide Medical Services has been serving Indiana hospitals, physicians, medical labs, nursing homes, veterinarians, funeral homes, pharmaceutical companies and dentists since 1989. We are a

full-service medical waste disposal company serving over 3,100 clients throughout Indiana and the Midwest.

Our Services Are Cost Competitive And Flexible

Our Indianapolis facility is centrally located to serve you. Pick-ups are scheduled to meet your needs. Our mission is to be there when you need

us. 24-hour emergency response services are available.

Customer Satisfaction Ensured

Health care professionals rely on our dependable and courteous driver/service representatives and

our experienced management team. Your satisfaction is guaranteed.

Strict Compliance With All Regulations

We maintain strict compliance with all local, state, and federal standards and regulations. Our collection and disposal services meet or exceed all OSHA, DOT, IDEM and EPA rules. We provide cradle to grave liability management and complete destruction documentation with a bar code manifest

tracking system. Manifests and certificates of destruction are returned with invoices at no additional charge. All documentation complies with the Medical Waste Tracking Act.

What is Regulated Medical Waste?

"Potentially Infectious Materials", which are defined to include -- Body fluids (as defined herein) -- Unfixed human tissue or organs -- Cultures or stocks of any virus, bacterium or other organism that is HIV or HBV or contains HIV or HBV -- Tissues, organs, body parts and body fluids from experimental animals infected with HIV or HBV -- Teeth in dentistry.

Items that are freely dripping liquid or semi-liquid blood or "potentially infectious materials" or could readily release them if compressed, and items containing dried

blood or "potentially infectious materials" that could release flakes or such waste if compressed or otherwise handled.

Sharps including hypodermic and suture needles, syringes with or without needles, tubing with needles, scalpel blades and broken glass or plastic items that have been contaminated with blood or "potentially infectious materials".

Certain Specified Body Fluids as follows: Blood and blood components -- Dialysate -- Amniotic, Cerebrospinal, Synovial, Plural, Peritoneal and Pericardial fluids -- Semen and Vaginal secretions -- Saliva in dental procedures.

Pathological or microbiological wastes that include blood or "potentially infectious materials".

What Goes in Sharps Containers

Sharps Containers - What Goes In? What Stays Out?

There is no black and white answer to what goes into a sharps container and what stays out. These health care professional guidelines are based on OSHA standards and common sense.

What goes into a sharp container?

Items specifically listed in most states but not limited to include the following:

- Hypodermic needles
- Syringes with needles attached
- Scalpels
- Pasteur pipettes
- Blood vials
- Culture dishes
- Broken glassware (e.g., specimen tubes, flasks, beakers)
- Exposed dental wires
- Nonabsorbent materials such as IV tubing, needleless connectors, barrel syringes without a needle, and IV bags contaminated with visible blood

What does NOT go into a sharp container?

- Package wrappers
- Sterile saline and water vials that have not come in contact with infectious waste
- Absorbent dressings that are not saturated according to OSHA guidelines.
- Nonabsorbent materials such as IV bags, and gloves that are not contaminated
- Miscellaneous household trash

Note: These guidelines address sharps container usage only. Guidelines for red bag waste and Regulated Medical waste containers available upon request.

Sharps Containers and Supplies

A Complete Line of Sizes for Sharps Collection

Strong, polypropylene meets industry standards for puncture resistance

Available in translucent color to provide visual identification of fill level

Locking lids for safe transport

Wall mounting available

We are proud to offer Bemis sharps container products. At Bemis, the first priority in sharps container development is

safety--safety for your patients and your staff. All units are designed for safe use, effectively blocking hand access from discarded sharps. Units snap together, permanently locking with tight seams between the bases and covers. Walls are puncture-resistant too, meeting or exceeding ASTM standards.

For optimum efficiency, Bemis offers a variety of sharps disposal units so your staff can work with the size that fits the application, reducing overall hospital waste. Bemis Sharps containers are designed to nest, saving money in shipping and storage too.

Bemis Sharps Containers are designed for a range of ideal size-to-use applications. While some sharps containers require you to invest in an expensive locking cabinet, Bemis Sharps Containers offer unobtrusive mounting brackets to complement any patient or treatment room setting. Either type of mounting bracket allows for easy, safe changeover.
